

Notice To Tenants Of Overflowing From Clogged Drain Pipes

The drain got clogged

The water overflows throughout the entire house.

Because of American Toilet paper.

Due to a blockage at the junction after the merging of all households, it was not possible to identify the specific household. There was a blockage of paper that had not melted at all along with paper that was not dissolved.

- Foreign-made toilet paper is thick and its fibers do not dissolve easily.
- Japanese toilets have narrow plumbing, and the amount of water that flows at once is small.

Please use Japanese toilet paper!
DO NOT use American toilet paper or toilet paper from COSTCO.

Thank You for
Your Cooperation!
